PROJECTS

- SubscriBuy – Developed a subscription-based grocery delivery platform for rural areas with secure payments and optimized delivery routes.
- Water Flow & Level System – Created an IoT system for monitoring water flow and levels with real-time data storage and automated reports.
- AI Face Detection & Age Prediction – Built a Flask app using DeepFace for face detection and age prediction from images.
- Recipe App – Developed a Flutter mobile app for browsing and saving recipes with Firebase integration.

WORK EXPERIENCE

Software Developer (Trainee)

Chief Secretary Office – Southern Province (July 2024 – January 2025)

- Designed, developed, and maintained software solutions to improve office operations.
- Developed a Circular Management System, reducing manual paperwork and making circular approval 50% faster with a structured digital process.
- Built a Feedback System, allowing users to submit service reviews, helping the office identify and improve weak areas in service delivery.
